

TWS Earbud Charging Case

HT45F2440

Characteristics

- Type-C input withstand voltage up to 28V, charging current up to 1A
- Integrated automatic thermal regulation
- Outputs 5V to charge the earbud, with only 6 μ A current consumption
- AM communication via the earbud charging terminal
- Over-current and short-circuit protection functions

Applications

TWS earbud charging cases, etc.
