

# DALI Workshop

## Characteristics

- In compliance with IEC 62386-101/102/207/209(Tc)
- DALI interface, has a 260V withstand voltage
- 7V ~ 30V wide operating voltage range
- Uses DIP switches or adjusts resistance to control the PWM output
- PWM dimming depth: 0.1%

## Applications

DALI constant current drivers, DALI constant voltage drivers, etc.
