

MIDI Music Module (Mid-range)

BM72D5221-1

Characteristics

- Supports electronic drum anti-crosstalk, dual trigger, hi-hat stop and trigger calibration functions
- Integrated 64Mbit Data Flash, 90 percussion tones
- Can customize drum kit parameters, stores recording files when power-off, requires external Flash Data Memory
- Supports USB MIDI IN/OUT
- Support for BMduino (Arduino) development

Applications

Electronic drums, electronic wind instruments, etc.
