

# Air Flow Rate Digital Sensor

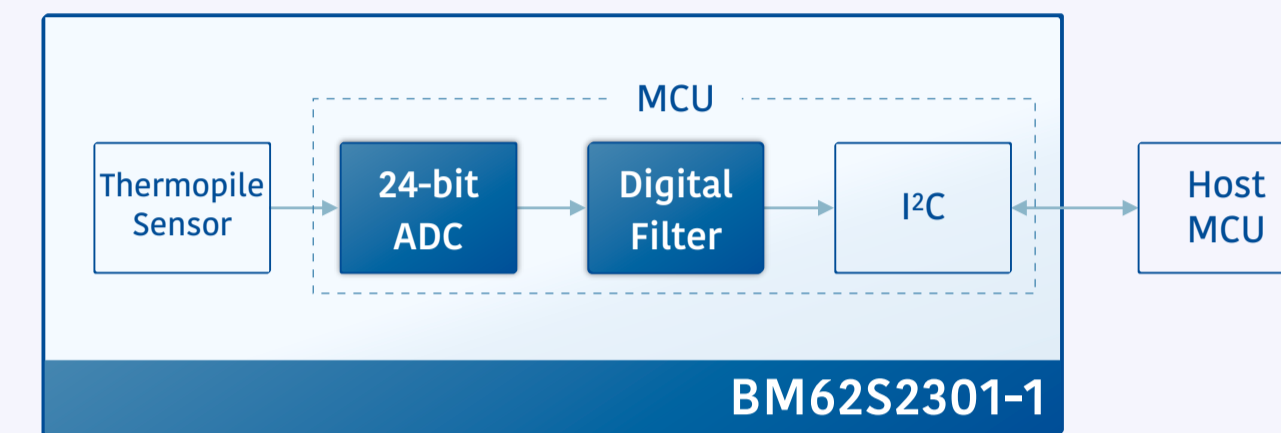

## BM62S2301-1

### Characteristics

- Hot-wire flow rate detection, excellent sensitivity and repeatability
- 100% factory calibrated, 5% F.S. accuracy
- Low-power application, reducing main system power consumption
- I<sup>2</sup>C standard communication to provide digital output
- 10-pin SMD small package, applied to air filtration, HVAC control or server cooling systems

### Block Diagram

### Applications

HVAC equipment, air duct blockage detection equipment, respirators, etc.
