

B05 150W/150Wh Portable Power Station

24V/120W Power Adapter (HT7A4001F)

Characteristics

- Wide voltage input: 100~240VAC, 50/60Hz, suitable for global power grids
- System efficiency up to 89%
- Integrated EMI suppression to reduce electromagnetic interference
- Integrated soft-start function to reduce the start-up current shock and protect the power supply and load components
- Input over/under voltage, output over voltage/current, short circuit protection, etc.

Block Diagram

Applications

Portable power stations, outdoor power charging adapters, etc.
